CURRENT RESEARCH

SOCIAL PERCEPTION

Accuracy and Error in Person Perception:

- Using Motion Analysis (Vicon) to Specify Nonverbal Motion That Affects Person Construal
- Affective, Cognitive, and Perceptual Determinants of Social Evaluation
- Developmental Examination of Person Categorization
- Cognitive and Affective Determinants of Person (Mis)Perception

Social Perception when Identities Intersect:

- Examination of Person Categorization
- Face and Body Perception

Resolving Social Ambiguity

- How Stereotyped Actions (e.g., emotion and gender typicality) Guide Person Perception (and **mis**perception) of Socially Ambiguous Targets

SELF PERCEPTION

Accuracy and Error in Self Perception:

- Affective Correlates (i.e., facial EMG) of One's Own Gender Typicality
- Extreme Comparisons: Extreme Prototypes Mislead Self-Judgments

METHODOLOGICAL EXPERTISE

Corneal Reflection Eye-Tracking (Tobii and ASL)

3D Motion Capture (for measuring body motion; Vicon and Optotrak)

Computer Mouse Tracking (for measuring concurrent activation of social constructs/categories)

Social Perception Experimental Techniques (computer animation of faces and bodies, face morphing – including identities and social categories)

Psychophysiological Measurement (facial EMG, electrodermal activity, cardiovascular reactivity)
